

Custom-Clean™

The Programmable Drain Controller By PMI

All Evaporative Coolers Are Not Created Equal

Different size units require different flush cycles and time periods to work properly. The **Custom-Clean™** by PMI gives you the ability to set a customized cleaning cycle that meets the need of your specific evaporative air cooler.

- **Reduces Harmful Scale Build-up.**
- **Keeps Your Unit Cleaner Longer.**
- **Retards Growth Of Odor Causing Bacteria.**
- **Optimizes Cleaning Effects And Water Consumption To The Size Of Your Unit.**
- **Environmentally Friendly And Safe.**

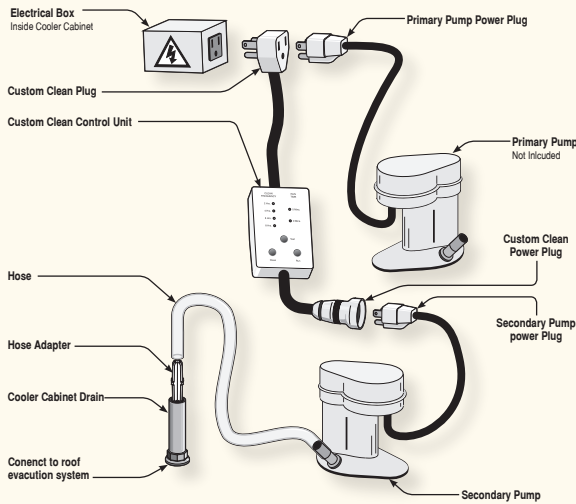

- 3 Piece Kit Includes:**
- CustomClean™ Controller Unit
 - Drain Tubing
 - Drain Hose Adapter

8 Custom Cleaning Cycles

Four dump frequency settings and two cleaning cycle time periods combine for a total of 8 custom settings which are designed to meet the needs of your individual evaporative air cooler.

Works With Most Brands of Evap Cooler

Custom-Clean™ is compatible with any brand of evaporative cooler and will help extend the life of your cooler

Extend the Life of Your Cooler

Extend the life of your evaporative cooler and keep it running cleaner and longer with Custom-Clean™.

Installation is Easy

Simply connect the **Custom-Clean™** to an extra water pump (not included) inside your cooler, set the Cleaning Frequency to 2, 4, 6 or 8 hours. Next, choose a run time of 5 minutes or 9 minutes, depending on the size of your cooler - That's it!

Customize the Cleaning Cycles

Custom-Clean™ allows you to customize the flush cycles to your exact cooler for optimum cleaning and allows for custom setting for both the dump frequency and time periods.
